

On Road Defensive Driver Training In All UK Areas

This training course by our DSA Approved Fleet Driver Training Instructors is designed for company car or van drivers. It teaches on road defensive driving skills which will improve your employee's awareness and observation skills and so reduce their driver risk level.

Meeting Your Training Needs

The training format can be adapted to suit your budget and exact requirements. The options are either a 1:1 or 2:1 training ratio over a full day or half day as below:

1/ The Importance of Vehicle Safety Checks

First, our instructor will demonstrate how to carry out daily vehicle safety checks and discuss the importance of ensuring vehicles are safe before starting a journey.

2/ The Driver Initial Assessment

This part of the course allows our trainers to assess your driver's habits and establish which areas to concentrate on during the main part of the training.

3/ Learning Defensive Driving Skills

The main part of the training involves learning defensive and advanced driving skills. Drivers learn techniques which encourage them to control the position and speed of their vehicle whilst adapting to road and traffic conditions.

4/ Encouraging Fuel Efficient Driving Techniques

Your company drivers will be encouraged to drive in a more eco-friendly and fuel efficient way and with more mechanical sympathy to the vehicle. These techniques have many cost benefits to your company.

5/ The Written Driving Assessment

A written report, based on the participant's performance and including risk areas and recommendations for further training, is produced at the end of the session.

What Should You Provide?

A suitable, roadworthy and fully insured vehicle. All drivers must hold a full drivers licence for the vehicle they will be driving. In some areas we can also provide on road training vehicles.
